

ABID ALI

Software Test Engineer (QA)

Lahore, Pakistan | +92 304 1454342 | abidaliaslam282@gmail.com | linkedin.com/in/abidali4438

PROFESSIONAL SUMMARY

Software Test Engineer with hands-on experience in manual functional, regression, smoke, sanity, exploratory, UAT, and cross-browser/cross-platform testing across POS systems, Electron desktop apps, native mobile apps, and web applications. Background as an ASP.NET Core developer provides a deeper understanding of application architecture during test design, bug analysis, and defect reproduction. Skilled at identifying, documenting, and tracking bugs, validating new features, and collaborating closely with developers to deliver reliable, high-quality software across Windows, macOS, Android, and iOS. Seeking a QA Engineer role where I can apply strong analytical skills and a quality-first mindset.

CORE QA SKILLS

Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing, UAT Testing, End-to-End (E2E) Testing, UI/UX Testing, Cross-Browser & Cross-Platform Testing, API Testing, Bug Reporting & Tracking, Test Case Design & Execution, Requirement Analysis, SDLC/STLC, Agile/Scrum

TECHNICAL SKILLS

Languages: C#, C++, JavaScript, SQL, HTML

Frameworks & Libraries: ASP.NET Core, MVC, jQuery, Bootstrap

Databases: SQL Server / SQL

Testing & Debugging Tools: Postman, Redmine, Chrome DevTools, VS Code Debugger

Cross-Platform Coverage: Windows, macOS, Android, iOS, Cross-Browser Testing

AI-Augmented QA Tools: Cursor, Claude, Codex (test scripting & debugging support)

Documentation & Reporting: MS Excel, MS Word, Photopea, Jasper, Grok

Concepts: Object-Oriented Programming, API Fundamentals, Version Control

WORK EXPERIENCE

Software Test Engineer (QA)

Sep 2025 – Present

ArkHITECH, Lahore

- Perform end-to-end manual QA across three core products — FoodNerd and Howmuch (POS systems) and Fruitfull (team management web app) — spanning Electron desktop apps, native mobile apps, and web platforms.
- Execute functional, regression, smoke, sanity, exploratory, UAT, and E2E testing across Windows, macOS, Android, and iOS to ensure consistent behavior across platforms.
- Conduct API testing using Postman and debug issues using Chrome DevTools and VS Code debugger to isolate root cause before escalating to developers.
- Log, prioritize, and track defects in Redmine, collaborating directly with developers to reproduce, triage, and resolve issues — reducing turnaround time on critical bugs.
- Perform cross-browser and cross-OS compatibility testing to catch platform-specific rendering and functionality issues.
- Leverage AI-assisted tools (Cursor, VS Code with Claude/Codex) to accelerate test script drafting and debugging, and tools such as Photopea and Jasper for visual bug reporting and QA documentation.
- Contribute to continuous process improvement initiatives to raise overall QA standards and product reliability.

Software Engineer – ASP.NET Core Developer

Jan 2024 – Jul 2025

SirizApps, Lahore

- Developed and maintained web applications using ASP.NET Core, MVC, and SQL.
- Built and debugged backend features, strengthening the ability to trace defects back to root cause during testing.
- Followed structured development and code review practices to ensure application reliability and quality.

Web Developer

Jun 2023 – Dec 2023

Perfect Solution, Islamabad

- Developed full-stack web features using C#, JavaScript, HTML, and Bootstrap.
- Assisted in testing and validating new functionality prior to release, gaining early exposure to QA workflows.

EDUCATION

Bachelor of Science in Computer Science

Feb 2021 – Jan 2025

Government College University, Faisalabad | GPA: 3.4 / 4.0

Intermediate

2021

Lahore, Pakistan

Languages Spoken: Punjabi (Native), Urdu (Native), English (Professional Working Proficiency), Hindi (Beginner)
